# Your town is leading the way with a Community Microgrid Feasibility Study

Clairview and Stanage Bay will be the focus of an exciting Community Microgrid Feasibility Study.

The study will investigate how innovative technology solutions, using solar energy, and battery storage integrated with smart communications devices, can improve the reliability of electricity supply to communities like yours on the fringe of the electricity network.

It will test different technology options to identify the best microgrid solutions to energise Queensland's remote and regional communities.

By advancing our capability to integrate renewable energy into our energy systems, the study will also support our state's journey to net zero emissions.

## Want to know more or be involved?

**Subscribe now for project updates – we want your community voice as part of this study.**

Simply go online to [www.ergon.com.au/microgrid-feasibility-study](http://www.ergon.com.au/microgrid-feasibility-study) or use the QR code, and subscribe.

You can also find out more about the project online or call us on 1300 653 055.
