

# **We're upgrading the electricity network on Magnetic Island**

Part of Energy Queensland

# We're improving the safety and reliability of your electricity supply – and protecting the Island's environment

Ergon Energy Network will soon be completing a range of upgrades and maintenance works on the local electricity network on Magnetic Island, to deliver a safe and reliable electricity supply, for residents and businesses.

We are improving the reliability of the electricity supply and reducing the need for crews to access difficult terrain in the National Park, so it's great news for local residents and the environment.

This work will be delivered in a series of projects, the first of which will commence in late 2024.

We're committed to keeping the community informed as these projects progress. To find out more about the projects, **you can register for electronic updates to be sent directly to you. Simply scan the QR code below**, or phone our project hotline on 1300 653 055.

Any personal information we collect about you will only be used and disclosed by us in accordance with our Privacy Statement available on our website.
