

Mossman Gorge Microgrid - caring for community and Country

Part of Energy Queensland

We're building a microgrid at Mossman Gorge on Kuku Yalanji Country

We're building a high voltage microgrid at Mossman Gorge. The \$5 million microgrid project will improve the reliability of the electricity supply for the local Mossman Gorge community.

We're helping to care for country too. The microgrid will store excess energy in a battery, which can be used later, when demand for electricity is high, meaning a more sustainable energy supply for Mossman Gorge.

Construction of the Mossman Gorge Microgrid is scheduled to commence later in 2024.

We're committed to keeping the Kuku Yalanji community and our other stakeholders informed as the project progresses. To find out more about the project, you can register for electronic updates to be sent directly to you. Simply scan the QR code below, or phone our project hotline on 1300 653 055.

Any personal information we collect about you will only be used and disclosed by us in accordance with our Privacy Statement available on our website.

Ergon Energy Network acknowledges the Traditional Custodians of the land on which we live and work, and recognise their continuing connection to land, waters and community. We pay respect to Elders past and present.
